# ENGAGEMENT SHOOT

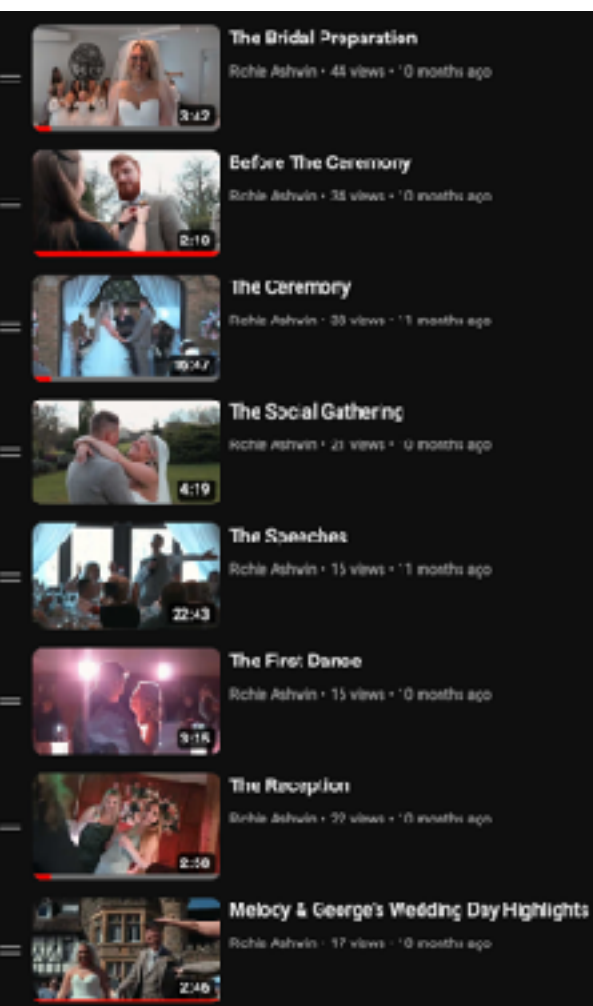

A pre-wedding engagement shoot gives you the opportunity to build a quality relationship between us, plus amazing images too.

It's a great chance for you to shake off any nervous feelings you may have being in front of the camera, ensuring that on your wedding day you'll feel completely natural and stress-free.

Think of this as a rehearsal, to build a connection with each other, discovering your good angles, poses and capturing your unique connection.

This shoot has other benefits besides the wedding day itself, your images can be used as 'save the date' invites to classy 'table decorations' inspiring your celebration with a personal touch.

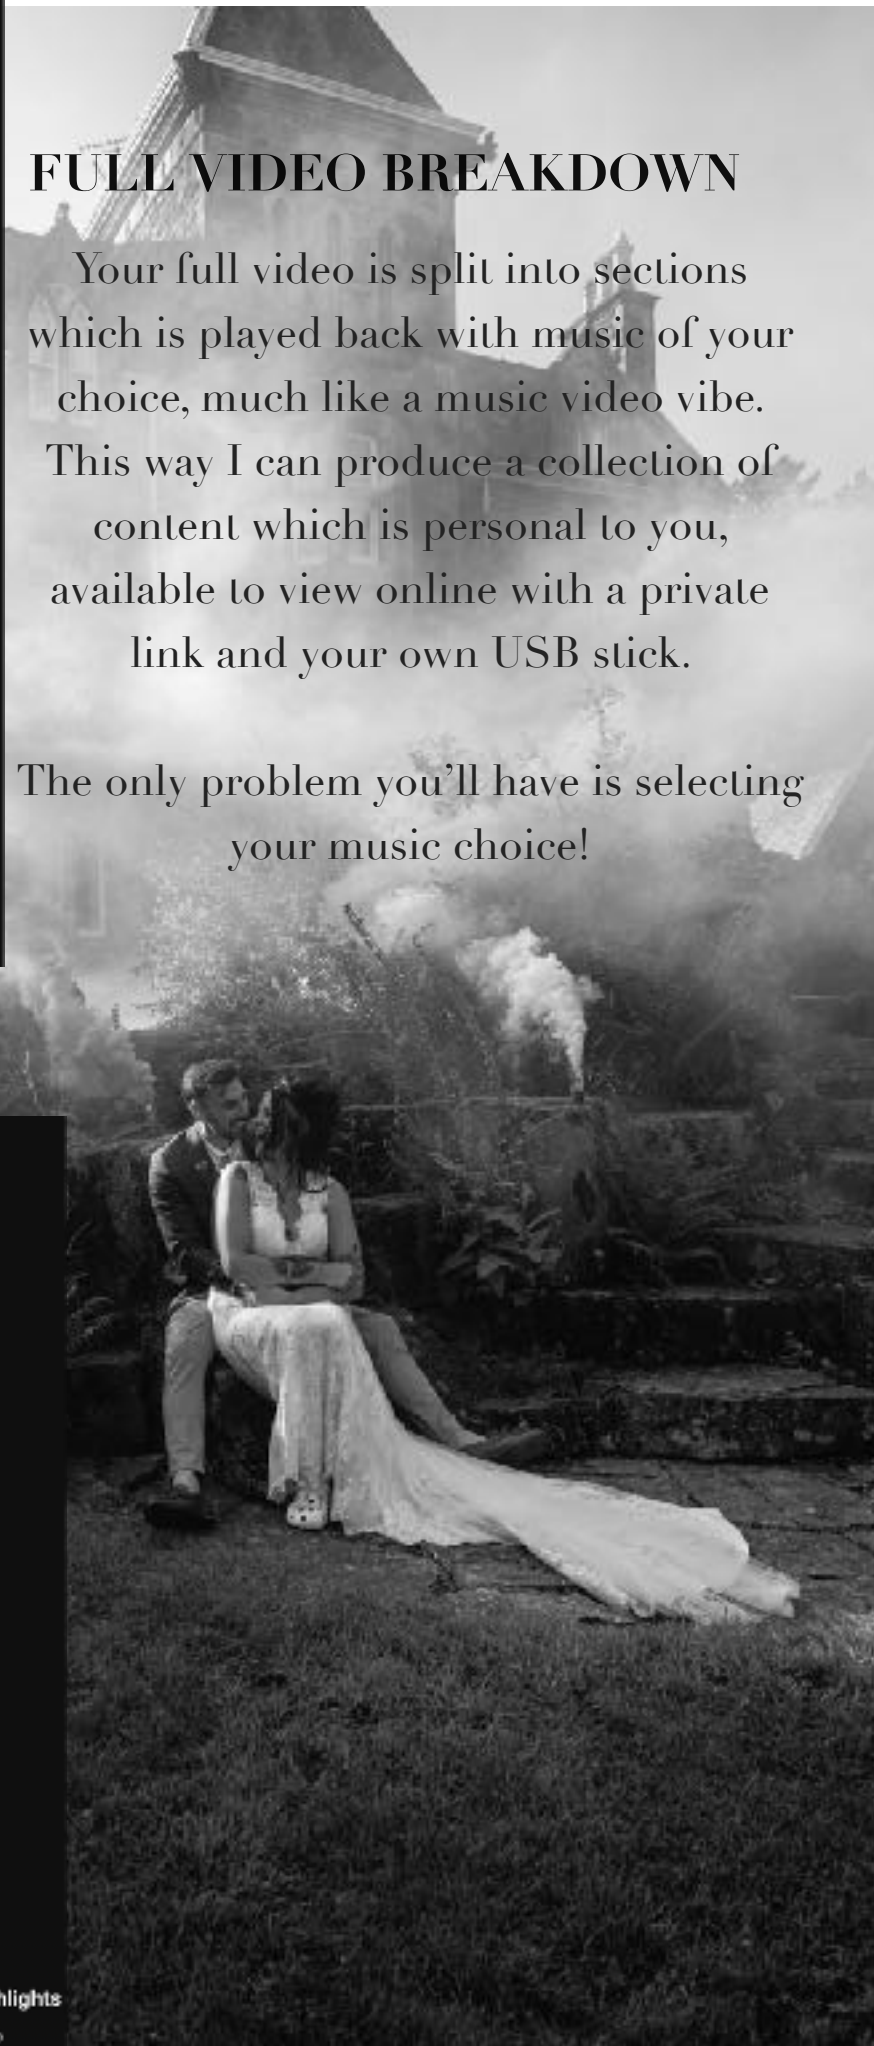

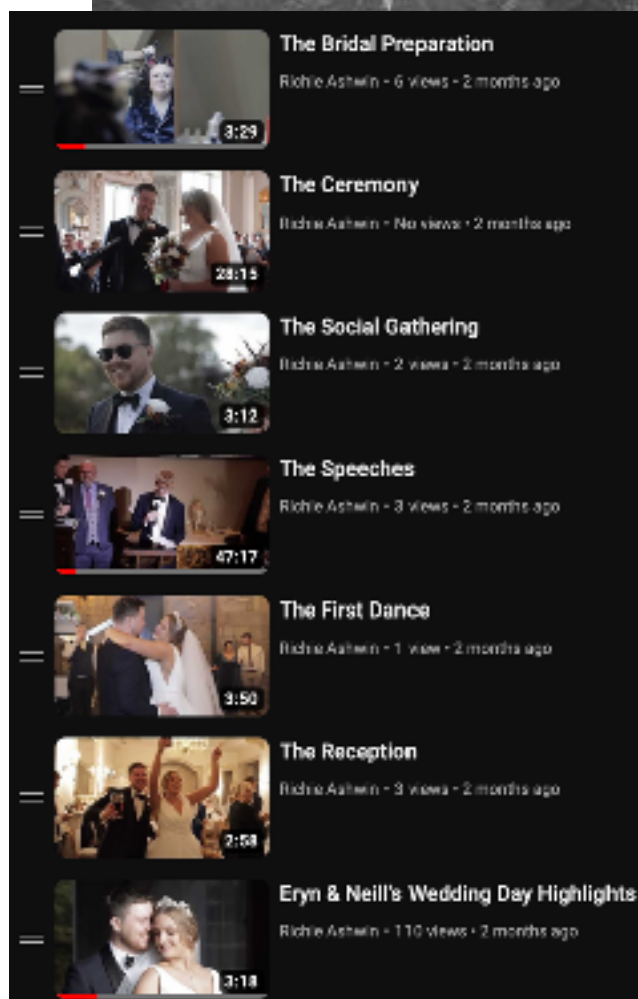

## FULL VIDEO BREAKDOWN

Your full video is split into sections which is played back with music of your choice, much like a music video vibe. This way I can produce a collection of content which is personal to you, available to view online with a private link and your own USB stick.

The only problem you'll have is selecting your music choice!

# COMMON Q's.

## Is a Videographer / Photographer really necessary?

Here's the thing — it's your day, so do it your way.

But one thing I hear all the time from guests is:  
“Oh, you're the videographer? I really wish we had someone like you at our wedding.”

Truth is, you'll never regret having your memories captured on camera — the laughter, the tears, the people you love most — so you can relive it all, over and over again.

Of course, I'd love to be the one to document your day.  
But honestly? I'd be more bummed if you didn't have anyone there to film it. So whether it's me or someone else — just make sure you have someone there to capture it all.

## I'm so awkward in front of a camera, what if I hate it?

Honestly, this is one of my favourite things to hear!

Here's the thing: if I'm doing my job right, you'll barely even notice I'm there for most of the day. My style is documentary, which means I'm all about capturing the real, in-between moments — the laughter, the glances, the little things that make your day yours.

The only time you'll properly see me is during your portrait session — and don't worry, I've got a few tricks up my sleeve to help you feel totally relaxed and natural in front of the camera.

Think of it more like hanging out with your partner than posing. No stiff smiles, no awkward moments — just the two of you being yourselves.

## Is it possible to cover both partners getting ready?

Absolutely — as long as you're both getting ready at the same venue (or nearby) and the timing works, it's usually no problem at all.

I'm pretty good at moving between both spaces to capture those key moments — the nerves, the laughs, the final touches — and turning them into timeless memories.

My goal is always to give you as much meaningful content as possible.  
If it's doable, I'll make it happen!
