FILMING YOUR LEGACY

FILMING YOUR LEGACY

Yo

I'm Richie,
the one man band who
captures the memories of your
wedding day and creates
videos you'll be able to watch

with your **lover**, friends,

family and *pets*

.. over and over again.

As a storyteller, If it's still or moving images you desire, I will be able to put your special day into a well documented visual that captures the true reflection of you both and how your wedding unfolds.

My aim is to ensure you have memories that will last a **lifetime**.

ENGAGEMENT SHOOT

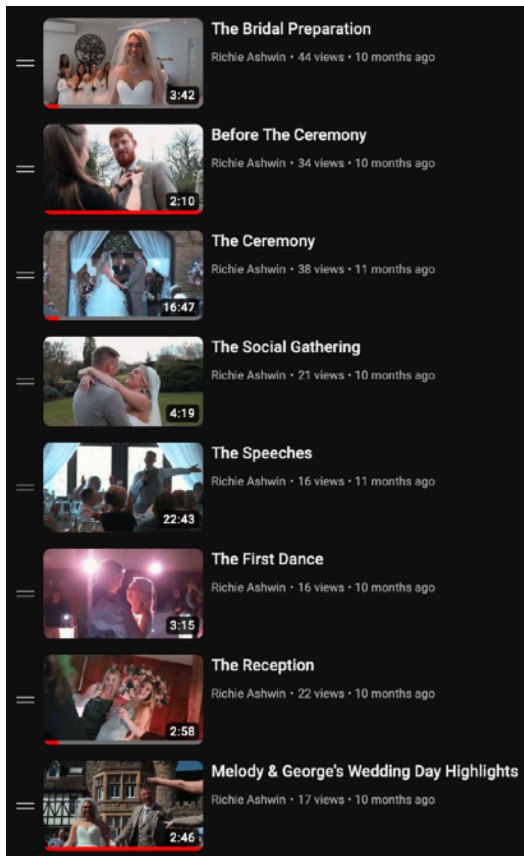

A pre-wedding engagement shoot gives you the opportunity to build a quality relationship between us, plus amazing images too.

It's a great chance for you to shake off any nervous feelings you may have being in front of the camera, ensuring that on your wedding day you'll feel completely natural and stress-free.

Think of this as a rehearsal, to build a connection with each other, discovering your good angles, poses and capturing your unique connection.

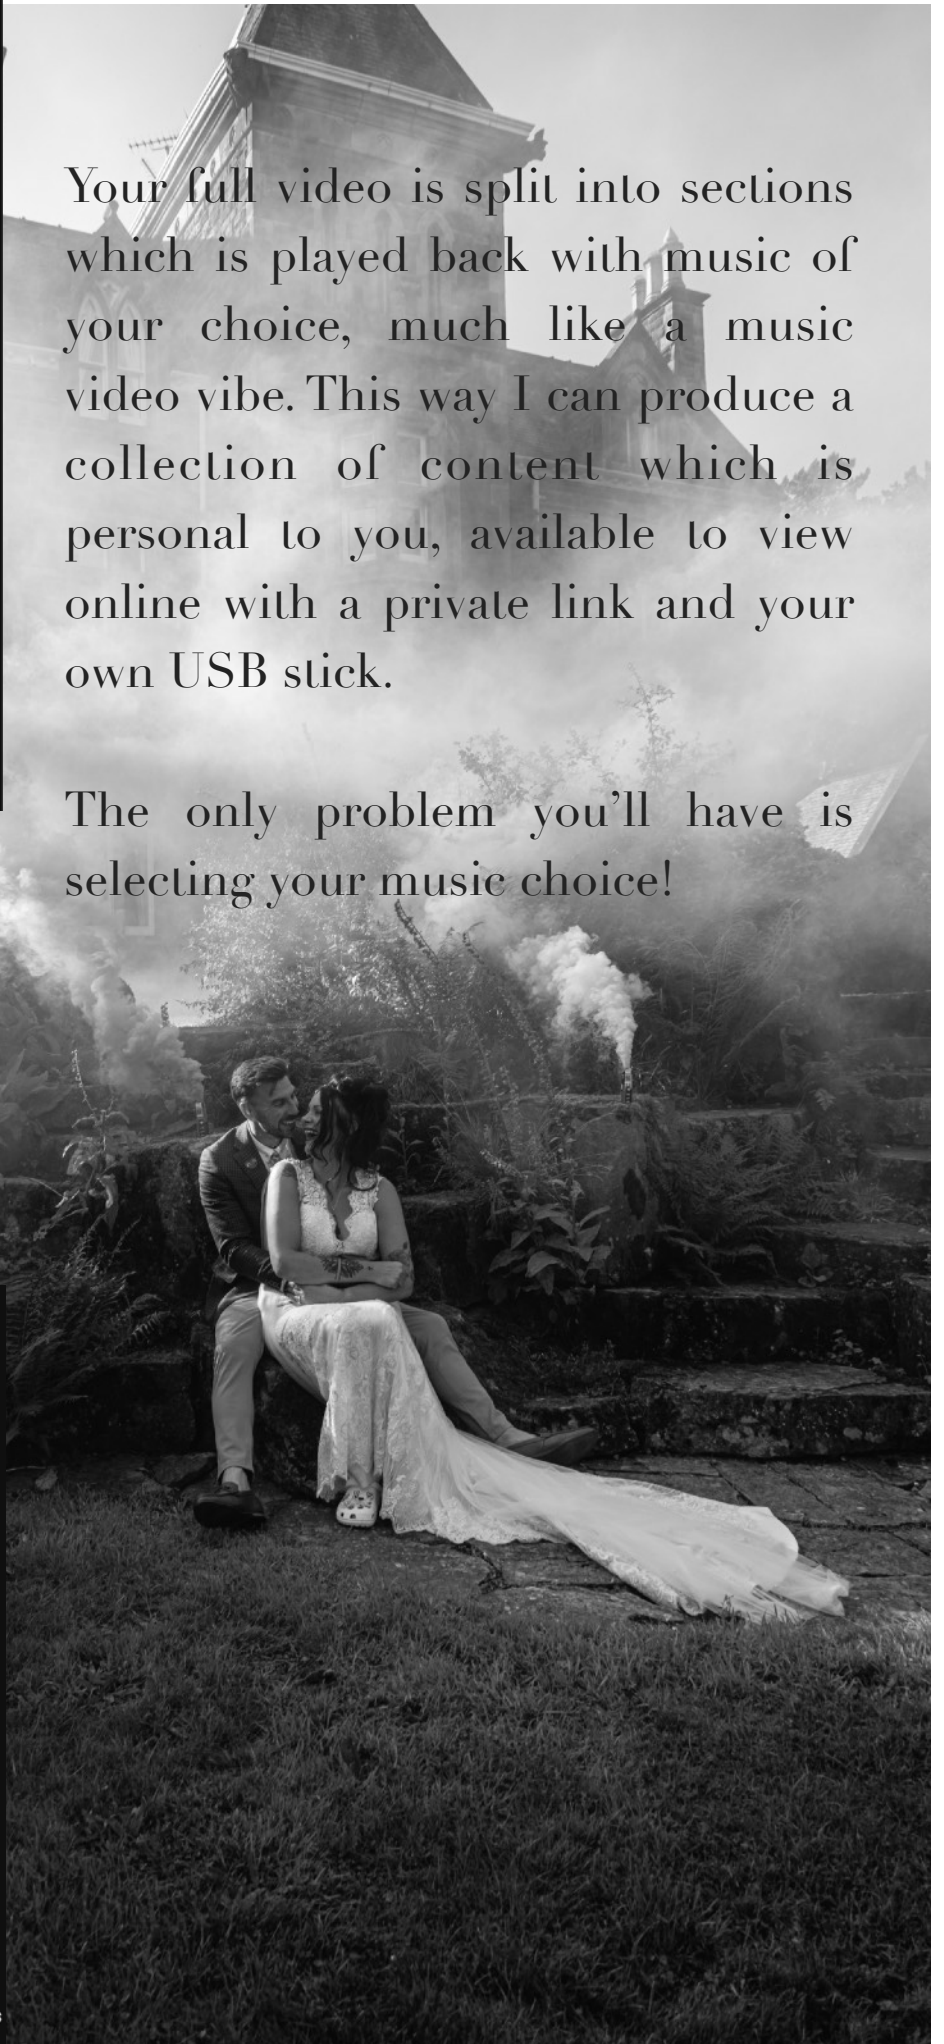

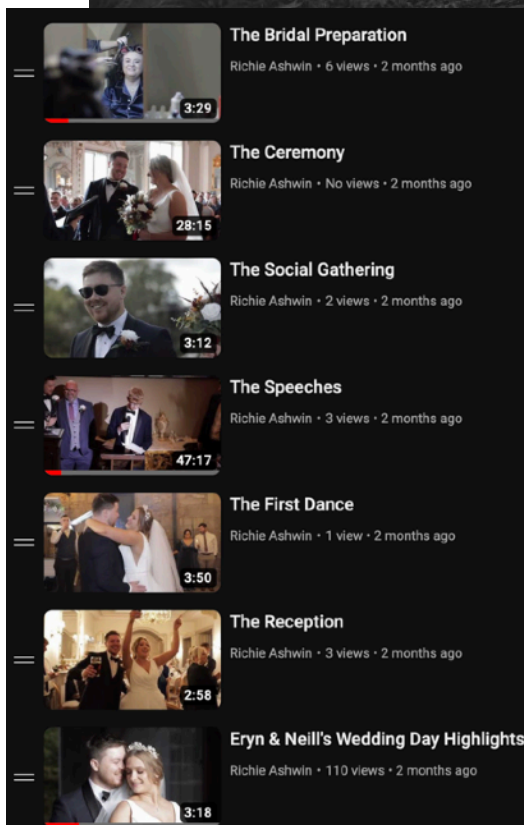

This shoot has other benefits besides the wedding day itself, your images can be used as 'save the date' invites to classy 'table decorations' inspiring your celebration with a personal touch.

Your full video is split into sections which is played back with music of your choice, much like a music video vibe. This way I can produce a collection of content which is personal to you, available to view online with a private link and your own USB stick.

The only problem you'll have is selecting your music choice!

COMMON Q's.

Do I need a videographer / photographer?

Well, It's your day, so do it your way!

Thing is, I'm constantly hearing from guests is:

"Oh, you're the videographer? I WISH we had had one at our wedding".

I can promise you'll never regret capturing your loved ones on camera and reliving your memories repeatedly.

Of course I want you to book me, but I'll be more annoyed if you didn't have somebody film your special day, just make sure you get someone!

I'm camera shy, will I hate being on camera?

My favorite line I love hearing!

Here's the thing, If I do my job right, hopefully, you'll not even notice that I'm there during the day. The only time you will definitely see me is during your portrait session and I have a few tricks up my sleeve to make you guys feel as comfortable as possible.

Remember; I'm a documentary shooter, so I get the most natural photos and videos when you guys are just chatting or having a laugh with each other.

Can you capture morning prep on both sides?

Should you both be in the same venue/grounds and time permitting, I can't see this being an issue.

I can usually work between both sides of prep' and grab some timeless content. My aim is to give you as much content as possible, if it's doable, I'll do it!

RICHIE ASHWIN
